

Amendments To The Claims

This Listing Of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 to 9 (Cancelled).

Claim 10 (Currently Amended): ~~The apparatus of Claim 9, wherein~~ Apparatus comprising:

(a) means for heating and cooling cab of a truck;

(b) for charging battery in the truck;

(c) generator means for supplying electricity of normal ac voltage as is allowable for 60 Hertz application to means (a) and means (b); for

(d) means to supply an alternative source of electricity,

means (c) is contained in a single enclosure that is mounted on the drome of the truck, and the enclosure is located under a door of the cab of the truck and has a step appendage, said apparatus is capable of being used during powered mobile operation of the truck and is capable of being used for elimination of the need for idling the engine of the truck when the truck is not moving under motorized power.

Claims 11 to 19 (Cancelled).

Claim 20 (Currently Presented): ~~The combination of Claim 19, wherein~~ Combination of a truck and an apparatus, the apparatus being mounted on the truck, the apparatus comprises:

(a) means for heating and cooling cab of the truck;

(b) means for charging at least one battery in said truck;

(c) generator means for supplying electricity of normal ac voltage as is allowable for 60 ac Hertz application to means (a) and (b); and

(d) means to supply an alternative source of electricity,
means (c) is contained in a single enclosure that is mounted on the frame of the
truck, and the enclosure is located under a door of the cab of the truck and has a
step appendage, said apparatus is capable of being used during powered mobile
operation of the truck, and is capable of being used for elimination of the need for
idling of the truck when the truck is not moving under motorized power.

Claim 21 (New): Apparatus comprising:

(a) means for heating and cooling cab of a truck;

(b) means for charging at least one battery in the truck;

(c) generator means for supplying electricity of normal ac voltage as is
allowable for 60 hertz application to means (a) and means (b); and

(d) means to supply an alternative source of electricity,

means (c) is powered by a diesel engine and is contained in a single enclosure that
is mounted on the frame of the truck, and the enclosure is located under a door of
the cab of the truck and has a step appendage, said apparatus is capable of being
used during powered mobile operation of the truck, and is capable of being used for
elimination of the need for idling of engine of the truck when the truck is not moving
under motorized power, the generator means (c) is a generator, the means (a) is a
unit capable of heating and cooling atmosphere in the cab of the truck and means
(b) is a battery charger that is capable of maintaining the at least one battery of the
truck, the apparatus also provides electricity to an immersion engine block heater of
the truck, and flow of the electricity to the immersion engine block heater of the truck
is controlled by an on-off block heater switch located on a remote control panel.

Claim 22 (New): The combination of Claim 21, wherein a breaker box is located on electrical line between the on-off block heater switch and the immersion engine block heater.
